Dear Josh,

Hope you have settled in at Stanford,
& have a decent place to live. The Warburgs
have not shown anything of interest -
have tried matched pairs of F+ & F- with
various substrates and inhibitors - no
systematic trend in any vis a vis F+ness.
Harlyn has a few ideas we may get
done before leaving. The only day to
suit the folk at Kansas is Mon 9th Feb,
so we will delay leaving until near
the end of next week - hope to
spend that week doing some ϕ^{32}
tests.

We will drop you a postcard
en route to say when we will arrive
Best wishes to you both

Peter
